Office Action Summary	Application No. 10/614,719	Applicant(s) SAILER, GOTTFRIED	
	Examiner William P. Watkins III	Art Unit 1772	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09 December 2005 has been entered.

2. The rejections using Rink in sections 2 and 4 of the office action mailed 25 August 2005 are withdrawn in view of applicant's amendments to the claims filed 09 December 2005. The examiner notes that applicant has deleted the reference to EP 0 721 831 A1 having sheet profiles in the specification. The position of the examiner is that this does not change applicant's admission in the original specification relied upon by the examiner in section 5 of the office action mailed 25 August 2005, as argued by applicant in the response filed 09 December 2005. The issue is moot, as the rejection using Rink is withdrawn in favor of the new grounds of rejection given

Art Unit: 1772

below. The examiner notes that the new limitation of "enclosing the flat edge sections around the openings" in claim 1 defines over the bent edge sections of Rink even if the metal sheets of Rink are considered to be profiles.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuki et al. (U.S. 2001/0039780 A1).

Matsuki et al. teaches in Figure 7 two profiles with flat flanges that are joined at the flanges. The flanges (elements 126 and 116) are taught as being joined by resin injected through holes and around the edges of the flanges (sections 0038, 0042 and Figures 8A and 8B). The reference teaches that the profiles may be of metal (sections 0025 and 0035). The instant invention claims two metal profiles that are joined by plastic molded through aligned holes in flat flange portions of

Art Unit: 1772

the profiles. It would have been obvious to one of ordinary skill in the art to have selected joining the profiles in the flange portions by injecting resin around and through holes in the flat portions of the flanges and making the profiles out of metal from the options for joining and choice of materials given in the reference in order to practice the invention taught by the reference.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Matsuki et al. (U.S. 2001/0039780).

The examiner takes the selection of profile joining methods and materials in the above rejection to be from such a small group of options as to constitute an anticipation.

Art Unit: 1772

7. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
